Product Labeling

Do all hearing aid-compatible handsets include labeling? Yes

Explain:

Do all hearing aid-compatible handsets that were tested under ANSI C63.19-2007, and that are capable of voice

communication over any air interface or frequency band that does not have hearing aid compatibility technical standards under ANSI C63.19-2007, include the required language disclosing that the handset has not been rated for hearing aid compatibility with respect to such operation?

N/A

Explain:

Do all hearing aid-compatible handsets that were certified only under ANSI C63.19-2007, but that the manufacturer also tested and found not to meet hearing aid compatibility requirements under ANSI C63.19-2011 for one or more operations that are not covered under ANSI C63.19-2007, include language informing users by clear and effective means that the handset does not meet the relevant rating or ratings with respect to such operation(s)?

N/A

Explain:

Do all handsets that are capable of use for Voice over LTE, and that were certified for inductive coupling capability under ANSI C63.19-2011 without being tested for inductive coupling capability over VoLTE, include language disclosing that they were not tested with respect to this operation?

Yes

Explain:

Do all handsets that meet the criteria for an M3 rating by allowing the user to reduce the maximum power for GSM operation in the 1900 MHz band include the required disclosure?

Explain:

Public Website

Does your company maintain a public website describing all hearing aid-compatible models, the ratings of those models, and an explanation of the rating system? Service provider websites must include the levels of functionality that the service provider has defined, the level that each hearing aid-compatible model falls under, and an explanation of how the functionality of the handsets varies at the different levels.

Yes

Explain:

Consumer Outreach

Describe consumer outreach efforts in the past 12 months: Project Fi makes HAC product information available to consumers on its website, which is referenced within this Report. Project Fi's handset materials also include information regarding HAC for consumers. On behalf of itself and its subsidiaries, Project Fi's parent company, Google Inc., engages regularly with a number of consumer groups including, but not limited to, the National Association of the Deaf and Hearing Loss Association of America, and participates in many conventions including the International Technology and Persons with Disabilities Conference.

Methodology for Functionality Levels

"Best" Category:

HAC devices categorized in the "Best" category include quad-band (or greater) GSM/CDMA devices, all of which are high-speed enabled. These devices feature higher-end design, material and finish, paired with a sophisticated user interface and functionality. Typically, such devices contain advanced features and applications.

"Good" Category:

Any HAC device that does not meet the qualifications to be in the "Best" category would be included in the "Good" category. Project Fi does not currently offer any devices in the "Good" category.

Report Remarks

You have reported the following handset model summary information.

Total number of handsets offered: 3

Air Interface	Fully Hearing Aid Compatible		Acoustic Coupling Compatible Only		Non-Compliant Handsets		Total by Air Interface
